## 1 Tulips

One of the most popular flowers. Grows from bulbs you just pop in the soil and basically watch them grow.

## 2 Peonies

One of my absolute faves! Big, beautiful and vibrant flowers that grow from plants you can buy from almost any nursery or your nearest Lowe's or Home Depot.

## 3 (Bearded) Iris

Also grow from bulbs. Make sure you give them plenty of space because they spread and grow like crazy! They survive almost anywhere making them very easy to grow.

## 4 Lilies

Buy in pots and plant. Very easy and they also spread and multiply from year to year so give them plenty of space or plan to separate and move them.

## 5 Hyacinth

One of the most beautifully fragrant flowers ever! They grow from bulbs in the early Spring and come back year after year.

## 6 Canna Lilies

Buy them in potted plants and put them in the ground. Watch them spread like crazy and bloom well into late summer. They are simply gorgeous.
